

# Software Product Description

**DIGITAL CLASSIFIED SOFTWARE**

**PRODUCT NAME: PRO/Installation and Maintenance,  
Version 1.5**

**SPD 40.12.01**

## **DESCRIPTION:**

PRO/Installation and Maintenance is a set of diskettes for the PRO-300 series personal computers which provides an additional level of testing above the Self-Test.

The SELF-STARTING SYSTEM TEST diskette is used to perform a quick test of the system unit.

The MAINTENANCE APPLICATION diskette is run as a Professional application program. For hard disk based systems, the software on this diskette can be installed onto the hard disk, or run directly from the diskette (in this case, the system must be started using P/OS Diskette). For systems without a hard disk, the software always runs directly from the diskette. The programs available on this diskette are:

- System Unit Test — Tests the system module and the optional hardware. Note that when running this program directly from diskette, the hard disk, if any, cannot be tested.
- Keyboard Key Test — Allows most keyboard keys to be tested
- Printer Test — Sends data to a printer
- Configuration Display — Displays the hardware contained in the system unit
- Bar Patterns — Displays color bars (or gray shaded bars) on the video monitor for systems that have the Extended Bit Map option

The TEST DISKETTE is required when the MAINTENANCE APPLICATION diskette software is not installed onto a hard disk. It is also used by the System Unit Test program described above.

## **MINIMUM HARDWARE REQUIRED:**

Any valid Professional 300 Series system configuration

## **OPTIONAL HARDWARE:**

VC241-A Extended Bit Map

KEF11-C Floating Point Adapter

digital  
software

July 1983  
BH-P976B-TH

**PREREQUISITE SOFTWARE:**

None

**OPTIONAL SOFTWARE:**

None

**SOFTWARE INSTALLATION:**

CUSTOMER INSTALLED

PRO/Installation and Maintenance is a software product engineered to be installed by the customer.

**SUPPORT CATEGORY:**

DIGITAL SUPPORTED

Please refer to the Limited Warranty below.

**DCS CLASSIFICATION:**

DIGITAL Developed

**ORDERING INFORMATION:**

PRO/Installation and Maintenance is included in the PC3K1-A—Country Kit for the Professional 300.

**ADDITIONAL SERVICES:**
