

Eleventh annual nationwide salary study covers 22 EDP positions; 2,367 installations with over 82,000 employes participate in survey

EDP Salary Study—1969

DATA processing salaries continued their upward trend, according to the results of BUSINESS AUTOMATION'S 11th annual EDP salary study. The nationwide survey covers 2,367 installations with 82,593 EDP employes and reports weekly salary data for 22 data processing jobs.

The top job, Manager of all EDP, has a nationwide average of \$303 per week, an 8 percent increase over the 1968 figure. Top average salary for the manager's job, \$349 per week, was reported by New York City. Second highest, \$338 per week, was reported by Washington, D.C.

The 2,367 survey participants were distributed across a nine-region area as follows: New England, 6.1 percent; Middle Atlantic, 18.7; South Atlantic, 12.1; East North Central, 29.4; East South Central, 1.7; West North Central, 8.0; West South Central, 6.6; Mountain, 3.8; and Pacific, 13.6. The regional salary breakdown is shown on page 50.

The number of EDP installations reporting directly to top management again showed an increase, with 40 percent indicating that they reported to presidential and vice presidential levels, as opposed to 39 percent for the prior year. The survey showed that a large majority of the systems analysis and programming operations continue to report to the EDP manager.

The percentage of participants indicating the purchase of equipment was 22.1, with 74.8 percent reporting that equipment was rented from the manufacturer. Both figures were about the same as last year. However, the number of participants reporting that they rented equipment from a lessor rose to 16.5 percent, up considerably from the 9.7 figure of a year ago; an indication that the leasing business is a thriving industry.

In an attempt to determine whether unionization was making progress in the EDP area, the participants were asked to indicate which positions, if any, were affected by union efforts. Only

206 returns reported any union membership and the majority of jobs affected were keypunch operators, 91.3 percent, computer operators, 73.8, and unit record equipment operators, 63.1.

The average number of data processing employes among the survey participants was 35.4. The average number of systems analysts was 4.4, and the average number of programmers was 6.9.

A majority of the installations, 67 percent, reported a 40 hour work week, with 21.1 percent indicating a 37.5 hour week. A surprisingly large percentage, 51.6, indicated no overtime compensation for systems analysts and programmers.

Of those reporting no overtime compensation, 71.8 percent gave as a reason that the workers were classified as professionals. Where salary level was a determining factor, the survey showed that \$191 was the weekly salary above which no overtime was paid.

Some 66 percent of the installations reported multiple shift operations and indicated that 5 and 10 percent were the most common salary differentials for the second and third shift operation.

The survey data was processed and compiled for BUSINESS AUTOMATION by Market Facts, Inc. at its Chicago computer center. Market Facts is one of the nation's leading market research firms.

Reprints of the 1969 EDP Salary Study, complete with job descriptions, are available at special quantity prices:

1— 9 copies, \$2.00 each
10—24 copies, \$1.60 each
25 or more, \$1.30 each.

Orders for less than \$5.00 must be accompanied by remittance. Price quotations for large quantity orders made on request. Mail all requests to Salary Survey Reprint Dept., % BUSINESS AUTOMATION, 288 Park Ave. West, Elmhurst, Ill. 60126

Job Descriptions

Manager of All Data Processing—Job No. 01

Plans, organizes and controls the overall activities of electronic data processing including systems analysis, programming, and computer operation activities through managing subordinates or by direct supervision. Personally handles major personnel, administrative and data processing problems.

Assistant Manager of Data Processing—Job No. 02

Under general direction, assists the manager in planning, organizing and controlling the various sections of the department. Usually has departmental line responsibility but in certain instances may only have departmental staff responsibility. Consults with and advises other departments with regard to feasibility, systems and procedures, and records control studies and problems. May act for the manager in his absence.

Manager of Systems Analysis—Job No. 10

Plans, organizes and controls the activities of the Systems Analysis Section in the establishment and implementation of new or revised systems and procedures concerned with electronic data processing. Usually considered as being in full charge of all systems analysis activities. Responsible for feasibility studies and systems design involving electronic data processing and makes recommendations on the action to be taken. Assigns personnel to the various projects and directs their activities. Consults with and advises other departments on systems and procedures.

Lead Systems Analyst—Job No. 11

Usually considered as the assistant manager of systems analysis. Has full technical knowledge of the activity and also has supervisory duties of instructing, directing and checking the work of the other systems analysts. Assists in planning, organizing and controlling the activities of the section. Assists in the scheduling of the work of the section and the assigning of personnel to the various projects being studied or processed. May act for the manager in his absence.

Senior Systems Analyst—Job No. 12

Under general direction, formulates logical statements of business problems and devises procedures for solutions of the problems. Usually competent to work at the highest level of all technical phases of systems analysis while working on his own most of the time. May give some direction and guidance to lower level classifications. Confers with management to define the data processing problem. Analyzes existing system logic difficulties and revises the logic and procedures involved as necessary. Develops logic and procedures to provide more efficient machine operations.

Junior Systems Analyst—Job No. 13

Under direct supervision, assists higher level classifications in devising computer system specifications and record layouts. Usually fairly competent to work on several phases of systems analysis with only general direction but still needs some instruction and guidance for the other phases. Studies and analyzes existing office procedures as assigned. Prepares systems flow charts to describe existing and proposed diagrams in accordance with instructions from higher level classifications.

Analysis and Programing—Jobs No. 16-19

Where analyst and programers are considered as one job, use applicable job descriptions from above.

Manager of Programing—Job No. 20

Plans, organizes and controls the preparation of computer programs for the solution of business problems. Usually considered as being in full charge of all programing activities. Assigns, outlines and coordinates the work of programers engaged in writing computer programs and routines. Establishes standards for block diagraming, machine flow charting and programing procedures. May write and debug complex programs. Reviews and evaluates the work of the staff and prepares periodic performance reports. Collaborates with systems analysts and other technical personnel in scheduling equipment analysis, feasibility studies and systems planning.

Lead Programmer—Job No. 21

Usually considered as the assistant manager of programing. Has a full technical knowledge of programing. Also has supervisory duties of instructing, assigning, directing and checking the work of the other programers. Assists in scheduling programing projects and in the assignment of personnel to the various projects. Coordinates the activities of the programing section with the other sections in the overall computer department. May act for the manager in his absence.

Senior Programer—Job No. 22

Under general supervision, develops and prepares machine logic flow charts for the solution of business problems. Usually competent to work at the highest level of all technical phases of programing while working on his own most of the time. May give some direction and guidance to lower level classifications. Analyzes problems outlined by systems analysts in terms of detailed equipment requirements and capabilities. Designs detailed machine logic flow charting. Verifies program logic by preparing test data for trial runs. Tests and debugs programs. Prepares instruction sheets to guide computer operators during production runs. Evaluates and modifies existing programs to take into account changes in systems requirements or equipment configurations. May translate detailed machine logic flow charts into coded machine instructions. May assist in determining the causes of computer operation malfunctions. May confer with technical personnel in systems analysis and application planning.

Junior Programmer—Job No. 23

Under direct supervision, assists in the review and analysis of detailed systems specifications and the preparation of the program instructions. Usually fairly competent to work on several phases of programing with only general direction but still needs some instruction and guidance for the other phases. Assists in the preparation of all levels of block diagrams and machine logic flow charts. Codes program instructions. Assists in preparing test data and testing and debugging programs. Assists in the documentation of all procedures used throughout the system.

EDP JOBS AND SALARIES

Manager of Computer Operations—Job No. 30

Plans, organizes and controls the operation of the computer and peripheral data processing equipment. Usually considered as being in full charge of all activities of equipment operations. Establishes detailed schedules for the utilization of all equipment to obtain maximum usage. Assigns personnel to the various operations and instructs them where necessary so they are trained to perform assigned duties in accordance with established methods and procedures. Reviews equipment logs and reports to the manager of data processing on equipment operation efficiency for the section.

Lead Computer Operator—Job No. 31

Usually considered the assistant manager of computer operations. Has supervisory duties of instruction, assigning, directing and checking the work of the other computer operators, including seniors. Assists in the scheduling of the operations and the assigning of personnel to the various items of equipment required for the computer functions. Coordinates activities of the section with other sections of the overall data processing department. May act as shift supervisor. May act for the manager in his absence.

Senior Computer Operator—Job No. 32

Under general supervision, monitors and controls computer by operating the central console. Usually competent to work at the highest level of all computer operation phases. May give some direction and guidance to lower level classifications. Studies program operating instruction sheets to determine equipment setup and run operation. Switches auxiliary equipment into circuit. Confers with technical personnel in the event errors require a change in instructions or sequence of operations. Maintains operating records such as machine performance and production reports.

Junior Computer Operator—Job No. 33

Under direct supervision, assists higher level classifications in monitoring and controlling computer. Usually fairly competent to work on several phases of computer operations with only general direction but still needs some instruction and guidance for the other phases. Assists higher level classifications in carrying out the various duties associated with operating a computer or the auxiliary equipment directly associated with the computer. May keep records regarding output units and maintain records for stores and supplies.

Computer I/O Control Manager—Job No. 38

Under direct supervision responsible for control records related to data input, such as establishing control totals, scheduling; also responsible for balancing and distributing completed reports.

Data Communications Console Opr.—Job No. 39

Under direct supervision operates various equipment involved in receiving and transmitting data over communication lines.

Manager of Unit Record Equipment—Job No. 40

Under supervision of the data processing manager, directs the personnel of the unit record department and manages the preparation of various reports and data. In non-computer installations may be considered manager of data processing with similar responsibility.

Operator, Unit Record Equipment—Job No. 41

Under supervision, operates all unit record equipment and assists in technical responsibility.

Tape Librarian—Job No. 49

Under direct supervision maintains library of magnetic tape and disc packs and related controls.

Keypunch Supervisor—Job No. 50

Under supervision of the data processing or unit record manager, plans, schedules, supervises and directs keypunching and verifying activities; maintains the corresponding files; supervises assigned personnel to carry out the above activities.

Lead Keypunch Operator—Job No. 51

Under direct supervision, assists in supervising the group engaged in operating keypunch and verifier machines; assists in the scheduling of keypunch functions; instructs workers on procedures used to perform routine assignments; trains new employees.

Senior Keypunch Operator—Job No. 52

Under direct supervision, operates keypunch and verifier machines; instructs workers on procedures used to perform routine assignments; assists in training new employees.

Junior Keypunch Operator—Job No. 53

Under direct supervision, operates keypunch machines and verifier machines; performs related clerical duties. ■
