Using a working set limited to 1050 pages and 45 pages of data storage (excluding image)

Total number object records read (both passes): 938
of which 469 were in libraries and 48 were DEBUG data records containing 1603 bytes

Number of modules extracted explicitly = 24
with 2 extracted to resolve undefined symbols

2 library searches were for symbols not in the library searched

A total of 0 global symbol table records was written
