This image displays a grid of 150 terminal window screenshots, arranged in 10 rows and 15 columns. Each window shows the output of a specific VAX/VMS command. The commands are listed in the leftmost column of each row:

- Row 1: SHOW CLD, SPAWN CLD
- Row 2: LFD CLD
- Row 3: START CLD
- Row 4: UNLOCK CLD
- Row 5: DCLTABLE1 LIS
- Row 6: DCLTABLE2 LIS
- Row 7: MORTABLES LIS
- Row 8: SORT CLD
- Row 9: SYNCH CLD
- Row 10: TYPE CLD

The screenshots show various system outputs, including process listings, command execution results, and error messages. The text is small and dense, typical of a terminal window printout. The overall layout is a dense grid of these individual terminal outputs.
