```
define verb unlock
  image unlock
  parameter p1,prompt='File',value(required,list,impcat,type=$infile)
  qualifier confirm
  qualifier log
```

This image displays a grid of 150 terminal window screenshots, arranged in 10 rows and 15 columns. Each window shows the output of a specific VAX/VMS command. The commands are listed in the leftmost column of each row:

- Row 1: SHOW CLD, SPAWN CLD
- Row 2: LFD CLD
- Row 3: START CLD
- Row 4: UNLOCK CLD
- Row 5: DCLTABLE1 LIS
- Row 6: DCLTABLE2 LIS
- Row 7: MORTABLES LIS
- Row 8: SORT CLD
- Row 9: SYNCH CLD
- Row 10: TYPE CLD

The screenshots show various system outputs, including process lists, command execution results, and error messages. The text is small and dense, typical of a terminal window printout. The overall appearance is that of a technical manual or a collection of diagnostic examples for the VAX/VMS operating system.
