FACILITY: SHOW utility

ABSTRACT:

These are the error messages used by the SHOW command

ENVIRONMENT:

VAX/VMS operating system, privileged user mode utility,  
operates at non-AST level.

AUTHOR: Gerry Smith

11-Oct-1982

MODIFIED BY:

- V03-008 AEW0001 Anne E. Warner 07-Aug-1984  
Add message show\$ mscpnold for when the MSCP-Server  
code is not loaded and the user tries to SHOW DEV/SERVED.
- V03-007 PRD0091 Paul R. DeStefano 06-Apr-1984  
Restored all V3 message values by moving all new  
messages to the end of the file. Changes first  
character in Show Cluster messages to lowercase.
- V03-006 PRD0082 Paul R. DeStefano 25-Mar-1984  
Added additional messages for Show Cluster.

This image displays a grid of 100 terminal window screenshots, arranged in 10 rows and 10 columns. Each window shows a different system utility or diagnostic tool. The most prominent and clearly legible windows include:

- SHOWTERM LIS**: Located in the upper right quadrant, showing terminal status information.
- SHOWMISC LIS**: Located in the middle left, showing miscellaneous system information.
- SHOWPROC LIS**: Located in the middle center, showing process status.
- SHOWSYS LIS**: Located in the middle right, showing system status.
- SHOWMAIN LIS**: Located in the lower middle left, showing main system information.
- SHOWMSCP LIS**: Located in the lower middle center, showing message processing status.
- SHOWMSG LIS**: Located in the lower middle right, showing message status.
- SHOWQUE LIS**: Located in the lower right, showing queue status.

The remaining windows in the grid show various other system utilities, including file listings, system configuration, and diagnostic reports, though their text is less legible due to the image's resolution and the small size of the individual windows.
