29     FACILITY:    DIRECTORY
30
31     ABSTRACT:
32
33     This module contains all of the error messages unique to the
34     DIRECTORY facility. It also contains messages for all of the
35     text used for headings, etc.
36
37     ENVIRONMENT:
38
39     VAX/VMS operating system, unprivileged user mode utilities.
40
41     --
42
43     AUTHOR:      L. Mark Pilant          CREATION DATE: 27-Sep-1983
44
45     MODIFIED BY:
46
47     V03-002 LMP0225          L. Mark Pilant,          8-Apr-1984 10:10
48     Change the text of the NOBACKUP message to read "backups
49     disabled" instead of "not backed up"
50
51     V03-001 LMP0211          L. Mark Pilant,          10-Mar-1984 12:46
52     Add additional messages for the file information obtained
53     directly from the disk ACP.
54

MESSAGE/LIS=LIS\$;DIRECTMSG/OBJ=OBJ\$;DIRECTMSG MSRC\$;DIRECTMSG

The image displays a grid of 100 terminal window screenshots, arranged in 10 rows and 10 columns. Each window shows a different system utility or data view. The windows are densely packed and contain various types of information, including:

- DIEMSG LIS**: A window showing a list of messages.
- MAIN LIS**: A window showing a list of mainframe data.
- DIR**: A window showing a directory listing.
- DIRECTORY MAP**: A window showing a graphical map of a directory structure.
- DIRECTDEF REQ**: A window showing a request for directory definitions.
- OUTPUT LIS**: A window showing a list of output files.
- DISPLYDEF SDI**: A window showing a display definition for a software development interface.
- DIRECTMSG LIS**: A window showing a list of directory messages.

Other windows show various data tables, command-line interfaces, and system status information. The text is small and difficult to read in many of the windows, but the overall layout is a comprehensive overview of the system's capabilities.
