Using a working set limited to 600 pages and 77 pages of data storage (excluding image)

Total number object records read (both passes): 254  
of which 69 were in libraries and 2 were DEBUG data records containing 76 bytes

Number of modules extracted explicitly = 1  
with 1 extracted to resolve undefined symbols

1 library searches were for symbols not in the library searched

A total of 4 global symbol table records was written
