Assembler run totals	242	00:00:00.92	00:00:13.78

The working set limit was 900 pages.
612 bytes (2 pages) of virtual memory were used to buffer the intermediate code.
There were 10 pages of symbol table space allocated to hold 3 non-local and 0 local symbols.
66 source lines were read in Pass 1, producing 11 object records in Pass 2.
0 pages of virtual memory were used to define 0 macros.

The image displays a grid of 144 small terminal window screenshots, arranged in 12 rows and 12 columns. Each window shows a different view of system data or error messages. Several windows are clearly legible and contain the following text:

- PAEND LIS**: A list of system parameters or error codes.
- PAERROR LIS**: A list of error messages or diagnostic information.
- PACONFIG LIS**: A list of configuration parameters or system settings.

The overall appearance is that of a multi-terminal session or a system diagnostic tool output, with each window providing a specific, detailed view of the system's state or performance.
