      Command processing:                             98   00:00:00.69     00:00:02.24
      Pass 1:                                        282   00:00:07.96     00:00:38.96
      Allocation/Relocation:                          27   00:00:00.50     00:00:01.85
      Pass 2:                                        261   00:00:20.62     00:00:41.94
      Map data after object module synopsis:          42   00:00:03.46     00:00:05.12
      Symbol table output:                             8   00:00:00.09     00:00:00.99
Total run values:                                    718   00:00:33.32     00:01:31.10

Using a working set limited to 900 pages and 798 pages of data storage (excluding image)

Total number object records read (both passes):   1691
      of which 816 were in libraries and 25 were DEBUG data records containing 2280 bytes

Number of modules extracted explicitly         = 11
      with 7 extracted to resolve undefined symbols

116 library searches were for symbols not in the library searched

A total of 0 global symbol table records was written
