The image displays a grid of 100 small terminal windows, each showing a different screen from the VAX/VMS operating system. The screens contain various text-based data, including system status, error messages, and program outputs. Some screens are clearly labeled with titles like 'EDFSOLMSG LIS', 'EDFMAIN LIS', 'EDFSHOW LIS', 'EDFGRF LIS', and 'EDFMSG LIS'. The overall appearance is that of a multi-processor system's console output.
