46 0046 1 1-002 - Only load EDT$CHMINSMOD - another module, built from this one,  
47 0047 1 will load EDT$CHMCHANGE. This will improve the program size  
48 0048 1 on the PDP-11, since the connectivity will be smaller. JBS 27-Sep-1982

92 0662 1
93 0663 1      This routine is called by EDT$CHMINSMOD to call
94 0664 1      EDT$$$SC_UPD. The call to this routine is ignored by the overlay
95 0665 1      analyzer, and so this routine makes sure that the caller is in
96 0666 1      memory before returning to it.
