A grid of 15 columns and 10 rows of terminal windows. Each window displays a different system utility or diagnostic tool. The windows are arranged in a regular grid pattern, with each cell containing a distinct interface. The interfaces vary in complexity, some showing simple text prompts, others displaying data tables, and some showing graphical representations like bar charts or histograms. The overall appearance is that of a multi-processor control panel or a system monitoring station from the late 1970s or early 1980s.

Visible window titles and content include:

- MESSAGE LIS
- ML11 LIS
- MSCP LIS
- MFTAPE LIS
- MOUNT LIS
- MEMORYS LIS
- MOUXX LIS
- MCHK.DTSP LIS
