0029    C       Author  Bill Storey                     Creation Date:  Unknown
0030
0031    C++
0032    C
0033    C       FUNCTIONAL DESCRIPTION:
0034    C
0035    C
0036    C       INTEGER*4 FUNCTION TIMCMP is used to compare two VAX/VMS
0037    C       absolute time values.  Each time value is a binary number
0038    C       in 100-nanosecond units offset from the system base date
0039    C       and time, which is 17-NOV-1858 00:00:00.0.   Each absolute
0040    C       time is a positive value.
0041    C
0042    C       If A > B then a positive number is returned.
0043    C
0044    C       If A = B then 0 is returned.
0045    C
0046    C       If A < B then a negative number is returned.
0047    C
0048    C       Modified by:
0049    C
0050    C       v02-001 BP0001          Brian Porter,           01-DEC-1981
0051    C               Added protection against garbage being in date field
0052    C               of error log entry header.
