0000 29 : FACILITY: FORTRAN Support Library - user callable
0000 30
0000 31 : ABSTRACT:
0000 32
0000 33 : This module contains the entry point for the FORTRAN
0000 34 : DECODE FORMATTED I/O statement. It is simply
0000 35 : a call to FOR$!N BFG with bits in R0 which describe the
0000 36 : parameter list. FOR$!IO_BEG interprets the parameters.
0000 37
0000 38 : MAINTENANCE NOTE:
0000 39 : The transfer vector (RTLVECTOR+ALLGBL) must have the following:
0000 40
0000 41 : .TRANSFER FOR$DECODE_MF
0000 42 : .MASK FOR$!IO_BEG
0000 43 : BRW FOR$DECODE_MF+2
0000 44
0000 45 : This puts the correct mask in entry vector, that is FOR$!IO_BEG entry mask.
0000 46 : Furthermore this module must only use R0 and R1
0000 47 : since any other register might not be in the entry mask for FOR$!IO_BEG.
0000 48
0000 49 : ENVIRONMENT: User access mode; mixture of AST level or not
