;    34          0034  1 ! ABSTRACT:
;    35          0035  1 !
;    36          0036  1 !       Implements the FORTRAN INQUIRE statement.
;    37          0037  1 !
;    38          0038  1 ! ENVIRONMENT: User mode, AST reentrant.
;    39          0039  1 !
;    40          0040  1 ! AUTHOR: Steven B. Lionel, CREATION DATE: 28-August-1979
;    41          0041  1 !
;    42          0042  1 ! EDIT HISTORY:
;    43          0043  1 !
;    44          0044  1 ! 1-001 - Original.  SBL 28-August-1979
;    45          0045  1 ! 1-002 - Add comments about AST disabling.  Also report errors
;    46          0046  1 !         RMS$_TYP and RMS$_VER as file name syntax errors.  SBL
;    47          0047  1 ! 1-003 - Instead of giving an error, just pretend units "poisoned"
;    48          0048  1 !         with DEFINE FILE, etc. aren't open.  SBL 21-Sept-1979
;    49          0049  1 ! 1-004 - Improve error handling.  SBL 8-Oct-1979
;    50          0050  1 ! 1-005 - Remove file name editing.  RMS does it now.  SBL 12-Oct-1979
;    51          0051  1 ! 1-006 - If FILEname invalid, return user supplied filename as NAME.  SBL 19-Oct-1979
;    52          0052  1 ! 1-007 - Add CARRIAGECONTROL keyword.  SBL 4-Dec-1979
;    53          0053  1 ! 1-008 - Class RMS$_SYN as file name specification error.  If wildcard
;    54          0054  1 !         present, don't report phony RMS error and don't scan LUNs.  SBL 6-Feb-1980
;    55          0055  1 ! 1-009 - Have NEXTREC simply fetch LUB$L_LOG_RECNO.  Remove the erroneous
;    56          0056  1 !         MIN which caused it to always return 1!  Correct the comment
;    57          0057  1 !         for MAXREC to conform to the code and spec.  Move declaration
```

```
;    58          0058  1 !          of ACTUALCOUNT to the inside of the routine which uses it.
;    59          0059  1 !          SBL 21-August-1980
;    60          0060  1 ! 1-010 - Add support for DEFAULTFILE.  JAW 01-Jul-1981
;    61          0061  1 ! 1-011 - Allow DEFAULTFILE value to be ASCIZ.  JAW 02-Jul-1981
;    62          0062  1 ! 1-012 - Open file for shared access.  SBL 2-Nov-1981
;    63          0063  1 ! 1-013 - Declare LIB$STOP external.  SBL 30-Nov-1981
;    64          0064  1 ! 1-014 - Do extra $PARSE after $SEARCH to make RMS clean up its internal
;    65          0065  1 !          structures.  Never signal any error except PUSH_CB errors in
;    66          0066  1 !          INQUIRE by UNIT.  SPR 11-47083  SBL 5-August-1982
;    67          0067  1 ! 1-015 - Don't do the $SEARCH for non-FOD devices, as it will return
;    68          0068  1 !          RMS$_IOP.  SBL 14-Jan-1983
;    69          0069  1 ! 1-016 - Make use of the fact that the FAB and NAM blocks are heap-allocated.
;    70          0070  1 !          Use prologue file.  SBL 20-Apr-1983
;    71          0071  1 ! 1-017 - Use individual NAM$V_WILD_xxx fields to determine if wildcard is
;    72          0072  1 !          present since search lists would trigger NAM$V_WILDCARD.  SBL 24-Aug-1983

1 ROUTINE PUSH_CCB (                    ! Call FOR$$CB_PUSH and return with value
1       UNIT) : CALL_CCB =
1
1 !++
1 ! ABSTRACT:
1 !
1 !       Call FOR$$CB_PUSH and return with a condition value as the function
1 !       result.  FOR$$CB_PUSH is not called directly as it may signal when
1 !       we do not desire it.
1 !
1 ! FORMAL PARAMETERS:
1 !
1 !       UNIT    - The unit to be pushed
1 !
1 ! FUNCTION RESULT:
1 !
1 !       Either SS$_NORMAL or the condition code of an error which was
1 !       signalled by FOR$$CB_PUSH.
