MODIFICATION HISTORY

```

V03-003 MSH0061      Michael S. Harvey      5-Jul-1984
      Add EXECUTE_ONLY qualifier.

V03-002 BLS0256      Benn Schreiber        27-Dec-1983
      Put conflicting qualifier rules here rather than in code.
      Make P1 a $INFILE so that uic format directories are legal.

V03-001 RPG0001      Bob Grosso            13-Sep-1983
      Support /NOPURGE with old interface.

```

```

define verb install
ROUTINE INSTALL START ! Feed this thing a routine name
parameter p1,label=file_spec,prompt='INSTALL>',value(type=$infile)
qualifier help
qualifier exit

qualifier create
qualifier delete
qualifier replace

qualifier list,          value(type=$outfile)
qualifier full,         value(type=$outfile)
qualifier global

qualifier open
qualifier shared

```

qualifier header_resident
qualifier privileged,value (list)
qualifier protected
qualifier writeable
qualifier nopurge
qualifier execute_only

disallow not file_spec and (list or global or full) and (delete
or replace)

disallow replace and not file_spec

disallow delete and (replace or create)

disallow (list or global or full) and (open or header_resident
or privileged or writeable
or create or nopurge or replace
or execute_only)

disallow replace and (open or header_resident or privileged or
writeable or create or nopurge or execute_only)
