Using a working set limited to 1050 pages and 52 pages of data storage (excluding image)

Total number object records read (both passes):   536
    of which 210 were in libraries and 8 were DEBUG data records containing 250 bytes

Number of modules extracted explicitly   = 4
    with 3 extracted to resolve undefined symbols

10 library searches were for symbols not in the library searched

A total of 11 global symbol table records was written
