The working set limit was 1350 pages.
40894 bytes (80 pages) of virtual memory were used to buffer the intermediate code.
There were 40 pages of symbol table space allocated to hold 830 non-local and 0 local symbols.
43 source lines were read in Pass 1, producing 44 object records in Pass 2.
18 pages of virtual memory were used to define 17 macros.
