35 | Symbols are defined following the standard for global names:
36 |
37 |     RPG$_abcmnoxyz
38 |
39 | In addition, the library standards specify that the letters "abc", "mno",
40 | and "xyz" are the first three letters of the first three words of the error
41 | message, not counting articles and prepositions.
42 |
43 |
44 |
45 | MACRO-32 Programming:
46 |
47 | The macro call:
48 |
49 |     $RPGDEF
50 |
51 | will cause all symbols to be made available to the module.
52 | The Run-time Library declares these symbols as EXTERNAL;
53 | the macros are provided only for the convenience of the user.
