Performance indicators

Phase	Page faults	CPU Time	Elapsed Time
Initialization	37	00:00:00.05	00:00:02.30
Command processing	123	00:00:00.46	00:00:03.35
Pass 1	401	00:00:10.19	00:00:38.89
Symbol table sort	0	00:00:00.98	00:00:02.22
Pass 2	288	00:00:03.24	00:00:10.96
Symbol table output	26	00:00:00.11	00:00:00.30
Psect synopsis output	2	00:00:00.02	00:00:00.02
Cross-reference output	0	00:00:00.00	00:00:00.00
Assembler run totals	880	00:00:15.05	00:00:58.04

The working set limit was 1950 pages.
91005 bytes (178 pages) of virtual memory were used to buffer the intermediate code.
There were 60 pages of symbol table space allocated to hold 859 non-local and 100 local symbols.
1735 source lines were read in Pass 1, producing 40 object records in Pass 2.
36 pages of virtual memory were used to define 33 macros.

Macro library statistics

Macro library name	Macros defined
_255DUA28:[RTPAD.OBJ]RTPAD.MLB;1	5
_255DUA28:[SYS.OBJ]LIB.MLB;1	1
_255DUA28:[SYSLIB]STARLET.MLB;2	24
TOTALS (all libraries)	30

968 GETS were required to define 30 macros.

There were no errors, warnings or information messages.
