The working set limit was 1350 pages.
38398 bytes (75 pages) of virtual memory were used to buffer the intermediate code.
There were 50 pages of symbol table space allocated to hold 803 non-local and 0 local symbols.
55 source lines were read in Pass 1, producing 48 object records in Pass 2.
14 pages of virtual memory were used to define 13 macros.
