28 2-002 SHA2002 Update for VAX-11 PASCAL V1.2. SHA 30-Sept-1980
29 1-001 - Original.
30
31 +
32 Symbols are defined following the standard for global names:
33
34     PASS_abcnmnoxyz
35
36 In addition, the library standards specify that the letters 'abc', 'mno',
37 and 'xyz' are the first three letters of the first three words of the error
38 message, not counting articles and prepositions.
39
40 The names of all procedures using each error condition value should appear
41 in the comments included with each error definition.
42
43
44 MACRO-32 Programming:
45
46 The macros call:
47
48     $PASDEF
49
50 will cause all symbols to be made available to the module.
51 These symbols are declared EXTERNAL by the Run-time Library,
52 the macros are provided only for the convenience of the user.
