28 | 2-002 SHA2002 Update for VAX-11 PASCAL V1.2. SHA 30-Sept-1980
29 | 1-001 - Original.
30 |
31 | +
32 | Symbols are defined following the standard for global names:
33 |
34 |     PASS_abcnmnoxyz
35 |
36 | In addition, the library standards specify that the letters "abc", "mno",
37 | and "xyz" are the first three letters of the first three words of the error
38 | message, not counting articles and prepositions.
39 |
40 | The names of all procedures using each error condition value should appear
41 | in the comments included with each error definition.
42 |
43 |
44 | MACRO-32 Programming:
45 |
46 | The macros call:
47 |
48 |     $PASDEF
49 |
50 | will cause all symbols to be made available to the module.
51 | These symbols are declared EXTERNAL by the Run-time Library,
52 | the macros are provided only for the convenience of the user.
53 |
54 | !-
55 |
