85 ! These message codes should not be used directly by a facility since
86 ! they do not contain a subsystem (i.e., facility) identifier or a
87 ! severity code. Use the following formula to calculate actual facility
88 ! message codes.
89
90 !         facility message code = common message code +
91 !                                 facility id * 65536 +
