SOFTWARE CATALOG

The Software Catalog is a list of the HP64000 Microprocessor Development System currently released software products and revision numbers. It is included as a feature of the Software Materials Subscription.

Product/revision sets shown in the catalog are compatible with other product/revision sets in the same catalog. No other compatibilities are expressed or implied.

The column "Current Rev." is the revision number of the most current software available. Customer orders are filled with this revision of the product. The column "Updated Rev." is the revision number of the product at the time of the last customer/field SMS distribution. Those products where the revision numbers differ are the result of minor changes to the software, that have minimal affect on the operation of the product.

The revision codes appear on the floppy disc label and on the floppy system generator display for the modules associated with the product.

The Software Part # appears on the top line of the floppy disc label along with the revision code.
