**Agilent E3238**

Signals Development System

Technical Specifications

**HF, VHF/UHF, and
Microwave Configurations**

Performance

The Agilent E3238 is designed to quickly locate elusive signals. E3238's fast sweep rate and high dynamic range significantly increase the probability of intercept. With the E3238, searches produce more hits quickly and efficiently.

Automation

The E3238 system automates common tasks so an operator can focus on more complex operations, work faster and accomplish more. It allows highly skilled operators to automate functions for less skilled operators. The system can even run unattended.

Adaptability

Optional user-programming software can be used to customize the E3238. Searches can be optimized to capture the signals of interest while disregarding extraneous signals. Displays can also be customized to increase productivity.

Integration

The E3238 can integrate with legacy systems and hand-off receivers. LAN, GP-IB, RS-232, or the VXI backplane can be used to communicate with other hardware. Windows® sockets provide fast communication between software processes, even from remote locations.

Optional
Software Features

35688D-AS9 User Programming

Option 35688D-AS9 allows users to extend the functionality of the E3238 and connect it to legacy systems. Extensions are written in C, and are dynamically linked into the E3238 as shared libraries. Software can be developed in Windows NT. Added functionality integrates seamlessly into the E3238 user-interface.

Shared library entry points
Socket interface
Spew interface
User menu
User pane (may require Motif™ programming)
User alarm task
Spectrum feature extraction
Energy history database pre-filter
Energy history database post-filter

35688D-ASH User Signal Programming

Option 35688D-ASH is an integrated software development environment to create, test, and deploy new signal types. Using a Programming Wizard, you can easily generate a working signal framework, and then drop in your own custom signal algorithms. The resulting program runs on a multi-processor VX008 DSP module, and is seamlessly integrated into the E3238 system. Using option 35688D-ASH, you can develop their own sensitive signals quickly.
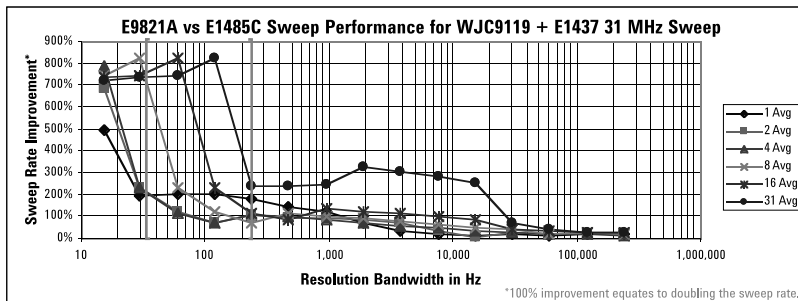

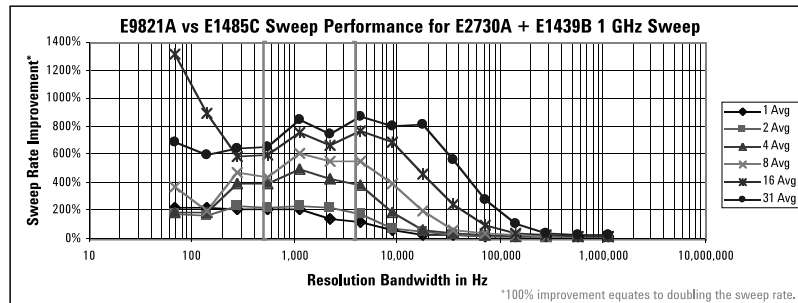

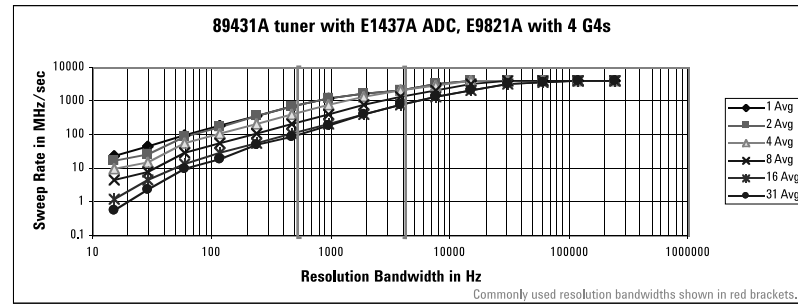

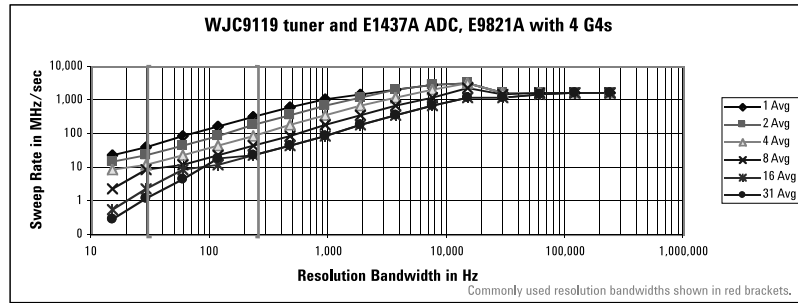

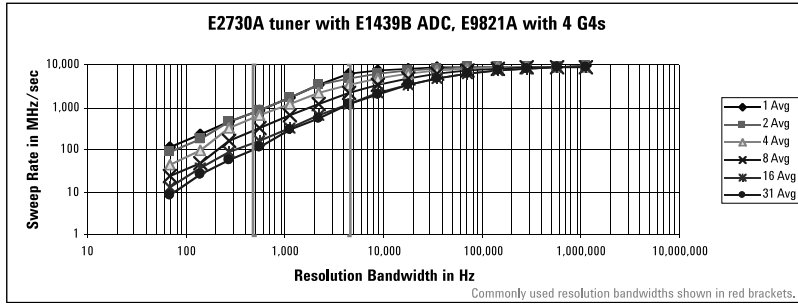

35688D-ASM Feature Studio

Option 35688D-ASM is a graphical program for creating complex-shaped upper and lower limit lines. It generates C code that is used with option 35688D-AS9 to implement limit lines to use as pre-filters in the E3238.

Specifications

	HF	HF/VHF/UHF	VHF/UHF	VHF/UHF	µWave

Benchmarks

Sweep Rate Performance

E2730A tuner with E1439B ADC, E9821A with 4 G4s

Commonly used resolution bandwidths shown in red brackets.

WJC9119 tuner and E1437A ADC, E9821A with 4 G4s

Commonly used resolution bandwidths shown in red brackets.

89431A tuner with E1437A ADC, E9821A with 4 G4s

Commonly used resolution bandwidths shown in red brackets.

E9821A vs E1485C Sweep Performance for E2730A + E1439B 1 GHz Sweep

*100% improvement equates to doubling the sweep rate.

E9821A vs E1485C Sweep Performance for WJC9119 + E1437 31 MHz Sweep

*100% improvement equates to doubling the sweep rate.

Specification Note

Specifications describe warranted and benchmarked performance over a temperature range of 0° to 50 °C (except where noted), after a 30 minute warm up from ambient conditions. Supplemental characteristics identified as "typical" and "characteristic" provide useful information by giving non-warranted performance parameters. Typical performance is applicable from 20° to 30 °C. For more detailed specifications refer to the technical specification datasheets of the individual system components.

Support

Agilent Technologies products are available globally. The E3238 is a commercial product and is easy to buy, maintain, and obtain professional support services.

The E3238 arrives with everything pre-installed and ready to run. Because the E3238 is standards-based, your investment is protected. As technology ramps, so can your system.

Warranty

The hardware in the E3238 system is covered by a three-year return to Agilent Technologies parts and labor warranty. The software is warranted for 90 days. Additional coverage may be purchased from Agilent. Contact your local Agilent representative.

* When the E9821A is used in an E1421B 6-slot VXI mainframe the maximum system temperature is 40 degrees Celsius.

Agilent Technologies' Test and Measurement Support, Services, and Assistance

Agilent Technologies aims to maximize the value you receive, while minimizing your risk and problems. We strive to ensure that you get the test and measurement capabilities you paid for and obtain the support you need. Our extensive support resources and services can help you choose the right Agilent products for your applications and apply them successfully. Every instrument and system we sell has a global warranty. Support is available for at least five years beyond the production life of the product. Two concepts underlie Agilent's overall support policy: "Our Promise" and "Your Advantage."

Our Promise

Our Promise means your Agilent test and measurement equipment will meet its advertised performance and functionality. When you are choosing new equipment, we will help you with product information, including realistic performance specifications and practical recommendations from experienced test engineers. When you use Agilent equipment, we can verify that it works properly, help with product operation, and provide basic measurement assistance for the use of specified capabilities, at no extra cost upon request. Many self-help tools are available.

Your Advantage

Your Advantage means that Agilent offers a wide range of additional expert test and measurement services, which you can purchase according to your unique technical and business needs. Solve problems efficiently and gain a competitive edge by contracting with us for calibration, extra-cost upgrades, out-of-warranty repairs, and on-site education and training, as well as design, system integration, project management, and other professional engineering services. Experienced Agilent engineers and technicians worldwide can help you maximize your productivity, optimize the return on investment of your Agilent instruments and systems, and obtain dependable measurement accuracy for the life of those products.
By internet, phone, or fax, get assistance with all your test & measurement needs
